

Never chase a customer for payment again.

Before you lift a tool, the homeowner's money is already in escrow — held by a licensed payment provider, not by us and not by them. **You can see it's there before you drive out.** When a stage is signed off it's paid to your bank account. No "I'll pay you Friday". No chasing last month's invoice.

HOW A JOB WORKS

1 Get invited Jobs come to you by trade and area, with photos and a budget — or browse the board.	2 Quote in minutes Lines from your price list, your own stages, a site visit first if you need one.	3 Money goes in Once chosen, the homeowner pays into escrow. Nothing starts until it's there.	4 Work in stages Mark a stage done. The homeowner approves — or it auto-releases after 7 days.	5 Get paid Each approved stage is released to your bank account as soon as it's approved. Not in 30 days.
---	---	---	--	---

WHAT YOU GET

No lead fees. Nothing up front.

No subscription, no charge per introduction. We only earn when you complete a job and get paid.

Your saved price list

Save the lines you quote every week — a DB board, a point, a geyser swap — and drop them in with a tap.

A QR code for your bakkie

Print it from your dashboard. Anyone who scans it lands on your profile and can invite you to quote.

Real jobs, described properly

Photos, budget, suburb and dates before you decide to quote. No wasted trips across town.

"I need to see it first"

Offer up to three times for a site visit from inside the job. The homeowner picks one; you get the address.

Reviews nobody can fake

Only a customer who hired and paid you through the site can review you. No anonymous one-star from a rival.

✓ A badge that means something

We check your ID and trade registration — wireman's licence, PIRB, SAQCC. Verified tradespeople are shown first.

Extras, agreed and paid properly

Rotten joists behind the tiles? Propose a variation with photos and a price. Accepted, it's paid into escrow like any stage.

Materials money before you start

Verified tradespeople can mark up to 25% of a quote as due before work begins; it's released on day one.

Quote while we check you

Be invited and quote from day one; checks take about 2 business days. Electrical, plumbing and gas work needs your registration uploaded before you start.

Quote your own customers

Send a quote to a customer you found yourself. They accept and pay into escrow — no deposit to chase.

One tap in, no password

Every email opens straight to the job — no signing in with muddy hands. Your number is never shown to homeowners.

BUILT FOR BIG JOBS TOO

Renovations, extensions and new builds — the money always in front of you.

One stage ahead, funded

Over R100 000 the homeowner pays for the next stage while you finish the current one. You never work on money that isn't in; they never pay for a whole build up front.

Compliance certificates handed over on the site

Upload the electrical, plumbing or gas certificate on the final stage; the homeowner confirms they have it and the money releases. Both of you keep a copy.

Retention that pays itself out

Set 0–10% for 30–90 days on your quote. It sits in escrow and pays out automatically when the defects period ends — no letter, no argument.

Projects with a main contractor

Group the electrician, plumber and tiler under one project. As main contractor you confirm each sub's stage on site; the homeowner sees that before approving.

NEW

There's now a Bricks & Sparks app.

Invitations, quotes, stage approvals and payouts on your phone, with **a notification the moment a homeowner accepts, pays or signs off.** Photograph extras straight into a variation. Search **Bricks & Sparks** in the App Store or on Google Play — same account as the site.
